MESSAGE FROM OUR FOUNDERS

Results do not just happen. They require continually strong and dedicated commitment from all our managers and employees, but we are sure that we will succeed in fulfilling our goals we have set for ourselves. Our employees are incredibly strong and motivated team which we are really proud to lead and that is the most important prerequisite for success.

MW TECH'S AMBITION....

...is to see our organization as an iconic service provider in the coming era of technology and wonders, where solutions are the demands and dreams of our customers.

MW TECH
Technical Services L.L.C

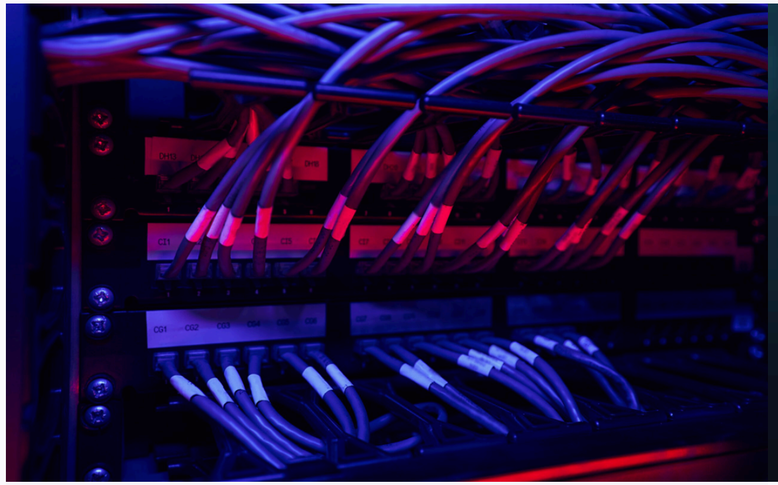

OUR COMPANY'S MISSION....

... is to provide smart and expert system oriented solutions that meets our customer's and client's needs with the help of our expert team and organization.

Our Core Service

Structured Cabling

MW Tech installers are certified by each proprietary cable manufacturer and undergo on-going training and seminars. Our Fluke testers are calibrated by best practice as recommended by the manufacturer's scheduling. Test technicians are certified by Fluke.

CCTV

·MW Tech provides consultancy, assessment and suggestions for securing any premises from small offices to malls, from classrooms to universities, from hotels to communities. We offer technologies that fit your budget as well as your requirements like IP cameras with NVR solutions, video monitoring and analytics and remote monitoring. Our services include:
· Implementation and Setup services - CCTV Security / Control room / providing migration of old to new solution and recording.
· Security consultancy and assessment including DPS (Dubai Protective Services) certification and integration.
· Storage solutions for recording, backup and remote monitoring.
· Designing and Cabling for security system.

Access Control Systems

MW Tech offers the most advanced, scalable Access Control System solutions that help businesses and residences regulate access on one door or hundreds of doors, for one person or for thousands of them. These electronic access control systems can be integrated and supplemented by a number of other security solutions, such as CCTV and BMS for maximum effectiveness. Our services include:
· Control building-wide or specific area access to your facility or secured areas.
· Authorities with Proximity, Biometric, Hand Punch, Iris scan, Pin and or a combination of multiple options.
· Car parking Access Control System and management.
· Video Door phones.
· Time and Attendance software solution with reporting.

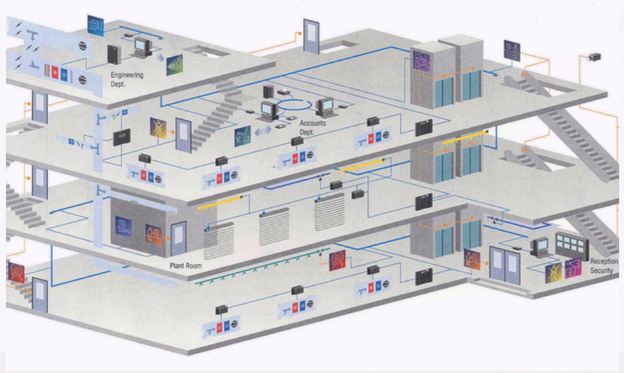

Fire Alarm System

In today’s world, those responsible for life safety and property protection face a wide array of threats, dangers and emergencies
From fire and gas to environmental and natural disasters. That’s true in all types of businesses, institutions and facilities, whether you work in the education, healthcare, government, commercial, hospitality or industrial sectors. In these highly challenging environments, safety and facilities organizations must be well prepared, equipped with appropriate fire and life-safety systems, and capable of communicating quickly and effectively in the event of an emergency.
Our services include:

Fire Detection and Alarm System.
CO2 Monitoring and Alarm System.
Central Battery System.

Building Management System

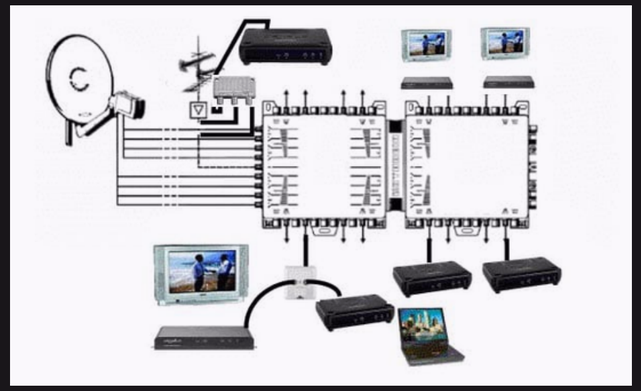

Building Management Systems are most commonly implemented in Medium and large projects with extensive mechanical, HVAC, electrical, and plumbing systems. Systems linked to a BMS typically represent 40% of a building's energy usage; if lighting is included, this number approaches 70%. BMS systems are a critical component to managing energy demand.
In addition to controlling the building's internal environment, BMS systems are sometimes linked to access control systems control- ling who is allowed access and egress to the building or other security systems such as CCTV and motion detectors. Fire alarm systems and elevators are also sometimes linked to a BMS, for monitoring and control.

OUR BUILDING MANAGEMENT SOLUTIONS INCLUDE:

Building Automation Systems
Smart Building Systems
Smart Home Systems
Energy Management Systems
Automation Central Control and Monitoring Rooms.

SMATV

MW Tech provides the SMATV system which is also known as Integrated Reception System (IRS). It is capable of delivering digital satellite TV services, Broadband Internet services and CCTV in the same network. The system distributes digital signals from the Communal Antenna to each home in the MDU. This helps in maintaining the appearance of the area and preserving the aesthetic look of the property by reducing the number of TV dishes at your rooftops or balconies. Our services include:

· Designing a custom satellite distribution solution for your property.
· Pre-wiring and termination of cables at each location specified at the apartment. Maintenance of the distribution network, components and cabling.
· Installations and support services
